

Software Information

Software	Mimsy XG is a client/server application written in Java, utilizing an Oracle database.
Licensing	Mimsy XG licensing is free for non-profit institutions. For-profit per-licence pricing is US \$4000. You may install Mimsy XG on as many machines as you wish, however, the system only allows the number of licensed connections to the database at one time. Maintenance is US \$800 per licence, up to a maximum of US \$12000 annually.
Database	<p>Mimsy XG uses Oracle 10g/11g as the database engine. There are 3 options for licensing Oracle: using Oracle Express 10g, Oracle 10g/11g by Named User, or by Processor.</p> <p>Oracle Express 10g: Oracle Express 10g is the free database distributed by Oracle. Oracle Express may be installed in the following environment:</p> <ul style="list-style-type: none"> • Server has a single Oracle database. • Database size does not exceed 4GB of user data (about 500,000 records). • Database may be installed on a multiple CPU server, but only executes on one processor in any server. • Oracle may be installed on a server with any amount of memory, but only uses up to 1GB of available memory. <p>License By Named User: A Named User is defined as a unique individual authorized to access Mimsy XG. Under the terms of Oracle's licensing, each person who will access the system needs his or her own unique logon. Oracle requires a minimum purchase of 5 Named User logons at US\$180.00 each (for a total of US \$900). Each additional Named User logon is US\$180.00.</p> <p>License By Processor: An Oracle license for a server with up to 2 sockets is US \$5800 per socket. A processor license will allow an unlimited number of users to log on at any given time. To determine your total cost if your server contains more than 2 sockets, please contact info@selagodesign.com</p>
PC/Mac	Mimsy XG runs on both Macintosh and PC computers. Please note that if you run in a cross-platform environment, images should be entered as URLs.
Installation	Selago Design's basic installation typically requires 1 day. During this time, we install Oracle on the server, install a training and production database, and train someone to install Mimsy XG on individual workstations. We will also install Möbius upon request.
Training	<p>Selago Design's basic end-user training course is three days long. In order to facilitate training, the institution will be required to provide a suitable training environment with enough networked machines running Mimsy XG so there are no more than two trainees per machine. Class sizes can be up to ten trainees, assuming there are enough computers. Selago's training is very flexible, and we can work with project coordinators to tailor a training plan that will enable you to make the most of the project.</p> <p>Training Additional Staff: Many large institutions have trained a core group of ten users and have then done single-day training sessions for other staff members. It has been our experience that once the core "power" users are trained, they are perfectly able to instruct staff on how Mimsy XG will be used on-site.</p>
Documentation	Selago Design provides electronic copies of our documentation. All sites receive a user manual, data structure, reporting workbook, and report definition manual. Organizations may create as many copies of documentation as needed for in-house use.
Reporting	<p>Our Help Desk provides Crystal Reports installation and procedural assistance as part of the annual maintenance contract. We are happy to help you modify existing reports or guide you as you create your own reports and forms. Any user who will build or modify reports will need a developer version of Crystal Reports.</p> <p>The Crystal Reports Java Viewer is included with your Mimsy XG license. The Runtime Viewer allows users to run all pre-built Mimsy XG reports and any reports built by staff without having to install a developer version of Crystal Reports. All sites wishing to run the pre-built reports must purchase at least one copy of Crystal Reports 11 Developer Edition or Crystal Reports 2008. By purchasing one copy of Crystal Reports 11 Developer Edition, you obtain proper licensing rights to install the Crystal Reports Runtime viewer on as many machines as you wish.</p> <p>At this time, a PC must be used for creating reports.</p>
Contact Us	<p>Feel free to contact us if you have any questions or if you wish to schedule an on-line or on site demonstration.</p> <p>Selago Design, Inc. 99 Fifth Avenue, Suite 214 Ottawa, ON K1S 5P5 Canada</p> <p>www.selagodesign.com</p>
